
APPENDIX A. ACKNOWLEDGMENTS

The Lake Whatcom Landscape Plan will be the preferred alternative adopted in the Final Environmental Impact Statement. This particular plan has been informed by landscape planning ideas and background work in the Lake Whatcom Landscape that were developed, considered, and either used or discarded by many different players between 1995 and the present. All this work directly or indirectly shaped the alternatives being considered in this Preliminary Draft Environmental Impact Statement. The Department of Natural Resources wishes to acknowledge all of these past contributions as well as those who worked on the PDEIS.
